

ADT 4P13503005 1300B\*F220

NSW28630

Conforming to IS 13232 (Part 1):2010, R-41012300

MADE IN CHINA

WARNING: This power adapter is not to be used for purposes other than those specified in the user manual. Do not use this power adapter with a power source other than the one specified in the user manual. Do not use this power adapter with a power source that is not grounded. Do not use this power adapter with a power source that is not protected against overcurrent. Do not use this power adapter with a power source that is not protected against short-circuiting. Do not use this power adapter with a power source that is not protected against lightning. Do not use this power adapter with a power source that is not protected against fire. Do not use this power adapter with a power source that is not protected against explosion. Do not use this power adapter with a power source that is not protected against radiation. Do not use this power adapter with a power source that is not protected against magnetic fields. Do not use this power adapter with a power source that is not protected against electric fields. Do not use this power adapter with a power source that is not protected against electromagnetic interference. Do not use this power adapter with a power source that is not protected against radio frequency interference. Do not use this power adapter with a power source that is not protected against microwave radiation. Do not use this power adapter with a power source that is not protected against ultraviolet radiation. Do not use this power adapter with a power source that is not protected against infrared radiation. Do not use this power adapter with a power source that is not protected against ionizing radiation. Do not use this power adapter with a power source that is not protected against non-ionizing radiation. Do not use this power adapter with a power source that is not protected against static electricity. Do not use this power adapter with a power source that is not protected against lightning strikes. Do not use this power adapter with a power source that is not protected against fire. Do not use this power adapter with a power source that is not protected against explosion. Do not use this power adapter with a power source that is not protected against radiation. Do not use this power adapter with a power source that is not protected against magnetic fields. Do not use this power adapter with a power source that is not protected against electric fields. Do not use this power adapter with a power source that is not protected against electromagnetic interference. Do not use this power adapter with a power source that is not protected against radio frequency interference. Do not use this power adapter with a power source that is not protected against microwave radiation. Do not use this power adapter with a power source that is not protected against ultraviolet radiation. Do not use this power adapter with a power source that is not protected against infrared radiation. Do not use this power adapter with a power source that is not protected against ionizing radiation. Do not use this power adapter with a power source that is not protected against non-ionizing radiation. Do not use this power adapter with a power source that is not protected against static electricity. Do not use this power adapter with a power source that is not protected against lightning strikes.
