

**CAUTION**  
Do not disassemble nor pierce battery pack. Do not put into the fire, make it shorted. Do not charge  
the battery pack other than the specified. It will cause the explosion or overheat if not handled  
properly.  
Do not use damaged, wet, or otherwise defective battery pack. Please refer to the user manual for  
more information.  
Do not use the battery pack in the rain or in other wet conditions.  
Do not use the battery pack in the area with high humidity.  
Do not use the battery pack in the area with high temperature.  
Do not use the battery pack in the area with high magnetic field.  
Do not use the battery pack in the area with high electromagnetic interference.  
Do not use the battery pack in the area with high voltage.  
Do not use the battery pack in the area with high current.  
Do not use the battery pack in the area with high frequency.  
Do not use the battery pack in the area with high power.  
Do not use the battery pack in the area with high speed.  
Do not use the battery pack in the area with high acceleration.  
Do not use the battery pack in the area with high deceleration.  
Do not use the battery pack in the area with high vibration.  
Do not use the battery pack in the area with high shock.  
Do not use the battery pack in the area with high impact.  
Do not use the battery pack in the area with high pressure.  
Do not use the battery pack in the area with high tension.  
Do not use the battery pack in the area with high stress.  
Do not use the battery pack in the area with high strain.  
Do not use the battery pack in the area with high deformation.  
Do not use the battery pack in the area with high distortion.  
Do not use the battery pack in the area with high displacement.  
Do not use the battery pack in the area with high rotation.  
Do not use the battery pack in the area with high translation.  
Do not use the battery pack in the area with high acceleration.  
Do not use the battery pack in the area with high deceleration.  
Do not use the battery pack in the area with high vibration.  
Do not use the battery pack in the area with high shock.  
Do not use the battery pack in the area with high impact.  
Do not use the battery pack in the area with high pressure.  
Do not use the battery pack in the area with high tension.  
Do not use the battery pack in the area with high stress.  
Do not use the battery pack in the area with high strain.  
Do not use the battery pack in the area with high deformation.  
Do not use the battery pack in the area with high distortion.  
Do not use the battery pack in the area with high displacement.  
Do not use the battery pack in the area with high rotation.  
Do not use the battery pack in the area with high translation.

Li-ion Battery Pack  
Model: PABAS223

DC 10.8V/10.8V --- 4400mAh

Must be recycled or disposed of properly.  
Doit être recyclé ou à fin détarasée-correctement.  
Muss recyclet oder umweltverträglich entsorgt werden.  
△ 必須リサイクルまたは適正処分を要する。必ずリサイクルまたは適正処分を行ってください。  
△ 必須回收或適當處理。請務必回收或適當處理。
